## **Part 7- How To Think Out Side The Box On eBay And Become A Property Tycoon In Weeks With Out Owning A Single Property!**

By Graham Waite

### **Thinking Outside The Box**

Thinking Outside the Box

Would you ever think of buying a high school and converting it into a house complete with cafeteria, gym, basketball and tennis courts. Armand Morin would, at the right price of course.

And Armand is not a crazy man. There's a difference between a crazy man and a rich, successful man with an outrageous imagination.

Not only would Armand have the audacity to buy a high school and convert it into a home but he would do it sight unseen. Now, I am sure we all agree that it sounds like a gamble but he is a legendary Internet marketer and he didn't get to where he is by going by the book.

It's all about the numbers and this old, decrepit high school that no-one wants to buy. It's on sale in the real estate section on eBay and the going price is \$75,000. Now most people would glance at that and think regular thoughts like: "what would I do with a high school?"

What Armand sees is not a deserted high school but a sprawling luxury home with all the high school facilities subtly transformed into the desirable features that would fetch at least twice or three times the original purchase price. Imagination is what it takes, imagination and the courage to take action.

His enthusiasm is boundless: "What if you had someone come in and you actually rehabbed the building and turned it into small offices? A high school is perfect for small offices. Or you could run a business incubator out of there..."

So doing business on the internet is not only confined to the buying and selling of web sites where it's virtual and you're dealing with digital products for the most part. Armand directs us to the real estate link on eBay and a whole new world opens up.

At any one time there are 900 to 1000 homes for sale on eBay so where do you start? He has ways to narrow the search down to the most beneficial buys. Once he narrows down his search he sorts it according to price. The system streamlines the process and gives you the criteria you need to go straight to the hot items.

And all of this property wheeling and dealing happens from the comfort of your own desk and your faithful computer. No tramping from house to house like a realtor. There are ways to safely buy and sell houses from a distance and get a guaranteed profit.

Morin's little system even allows him to sell a property for twice the price before he has completed his own purchase. But that's another story...
