Home :: About Us

Armed with exclusive rights in Australia for Revor Belgium, the Latex Bedding Co educates people on the superior quality of latex. David Nugent, a botany major and all-round science guy, has studied the antibacterial properties of this natural substance. He has been helping to select, design and manufacture mattresses and beds since 1983.

Cliff Walter spent several years working for the largest bed manufacturers in the southern hemisphere and six years retailing them at his own store. His relationship with spring coil beds taught him that latex was simply superior. It outlasted spring mattresses every time and conformed and supported the body in a way that spring mattresses could not.

Nothing can substitute for experience, and experience has taught these two businessmen to trust their product. It's a winner!

There is no better bed in the world, says David applying his scientific mind. Along with tossing around words like *Havea Brasiliensis* -- that's the **rubber tree** to the rest of us -- he's also studied the process of sleep and it's different cycles. The man knows what he's talking about.

It has styling, functionality and more features than any other bed I've seen, says Cliff. And he's seen a lot of beds.

Latex Bedding Co specializes in what it knows best, 100% latex bedding sourced from the first and biggest Latex mattress manufacturer in the world.

"When you have spent your youth reaching high and getting knocked down you appreciate a restful and relaxing sleep. My new bed from Latex Bedding Co. has given me the renewed energy and vitality to keep reaching high."

**Rex Mossop,  
Former Manly and  
Australian Rugby League  
International.**
